Junior Data Engineer

Dimitri NGUYEN

PROFILE
FullStack Engineer intern at Kepler Cheuvreux, I design and maintain ETL pipelines (Airflow) and automation workflows (n8n): quality checks, anomaly detection, alerting. Career changer through 42 Lausanne, looking to join a data team. Available from February 2027.

INFOS
nesplee.github.io
Area: French-speaking Switzerland
Available: 1 February 2027
Contact: via nesplee.github.io
github.com/Nesplee
French, C permit.

LANGUAGES
French - Native
English - Fluent B2

TECHNICAL SKILLS
- Data: SQL, Python, PostgreSQL, Airflow, n8n, star schema modeling.
- Programming languages: C, C++, Shell.
- Quality and version control: Git, automated testing, CI/CD.
- Virtualization: Docker, Docker Compose, virtual machines.
- Tools: FastAPI, REST API, SFTP, Jira, Strapi.
- Development environment: daily use of Linux, VS Code, Vim.

INTERESTS
Sports, music, cinema, collecting, travel.

SOFT SKILLS
- Fast learner and autonomous, shaped by 42's project-based learning.
- Ten years of team management: priorities under pressure, scheduling, staff training.

MAIN EXPERIENCE

FullStack Engineer Intern, Kepler Cheuvreux
Nyon, February 2026 - January 2027

- Airflow ETL pipelines (SFTP, API) feeding 4 reference tables (assets, compositions, valuations, spot levels).
- Designed around ten automation workflows (n8n): daily/weekly reporting, anomaly detection, price consistency checks cross-referencing two sources across more than 6,000 structured products.
- Daily monitoring of product composition (AMC) and alerting on missing issuer data (SFTP, API).
- Outcome: automated reports and alerts for the Sales, AMC and Management teams, where checks were previously manual or non-existent.

Team Manager, Café du Simplon, Lausanne
2014 - 2024
- Led a team of 3 to 4 on evening shifts: 80 to 150 covers per shift, high drinks volume.
- Hiring (around 150 trial shifts, 30 to 40 people trained), supplier orders, stock and cash count.

PERSONAL PROJECTS

Card Price Tracker Since August 2026

- Python pipeline in production (Airflow, PostgreSQL, FastAPI), resilient to ~37% transient failures, star schema, 73 automated tests (CI/CD).
- Diagnosed and resolved a real production incident (exhausted retry budget): reinforced checkpointing and idempotency.

Job Offers Aggregator Since August 2026

- n8n + PostgreSQL pipeline aggregating around ten job listing sources, hardened in production (error recovery, deduplication, secrets).

EDUCATION

École 42 Lausanne, 2024 - Present
- Project-based curriculum in C and C++ on Linux: pair programming, peer code review, Git.
- Minishell (Unix shell in C), Inception (Docker Compose infrastructure: Nginx, WordPress, MariaDB), Webserv (HTTP server in C++).
- System administration (Born2beroot), IP/subnet networking basics (NetPractice), algorithms (push_swap), 2D/3D raycasting games.

Foundation Year in Applied Arts, 2012
École Supérieure des Métiers Artistiques (ESMA), Montpellier
Baccalaureate, Economics & Social Sciences, 2010
Lycée Branly, Lyon 5
